

## Three-axle platform trailer Type: PW024

24t permissible total weight

### System advantages:

- aluminium side panels or frame side panels can be folded and removed all around
- centre and corner stanchions can be completely removed in just a few steps
- no separate locking system required for the stanchions, this saves time and maintenance effort
- on the approx. 9.880mm long and approx. 2.460mm are enough lashing points for securing the load
- optional extension gives loading space extension up to 1.000mm
- various equipment options can be selected individually

\*Some illustrations show vehicles with optional equipment.
